Summary

Full-stack and Software Engineer experienced in building scalable web applications and data systems for enterprise environments. Delivered significant improvements in system speed and cost efficiency through successful migration and automation projects, and integrated AI features into real-time workflows. Skilled in Python, SQL, cloud platforms, and both frontend and backend development. Ready to leverage technical expertise to build scalable software systems and full-stack applications.

EDUCATION

California State University – Sacramento, CA

Aug 2023 - Dec 2025

MASTER OF SCIENCE, COMPUTER SCIENCE

• **GPA:** 3.56/4

• **Coursework:** AI/ML, Mobile and Cloud Pragmatics, Advanced DBMS, Computer System Structure, Cryptography, Object Oriented Programming System.

Amrita Vishwa Vidyapeetham University – Bengaluru, India

Jul 2018 - May 2022

BACHELOR OF TECHNOLOGY, COMPUTER SCIENCE

• **GPA:** 3.48/4

• **Coursework:** Operating Systems, Software Engineering, DBMS, Compiler Design, Java, Data Structures & Algorithms, Probability Theory, NLP, Deep Learning, ML and Data Mining, Big Data Analytics, Information Security.

SKILLS

- **Programming & Software Engineering:** C, C++, Java, Python, JavaScript, SQL, PHP, OOP, DSA
- **Full Stack Development:** MERN (MongoDB, Express.js, React, Node.js)
- **Frontend & UI Development:** ReactJS, AngularJS, HTML5, CSS3, Bootstrap
- **Backend, Cloud & DevOps:** Node.js, REST APIs, Express.js, CI/CD, Spring Boot, AWS, Azure, OCI, Docker, Kubernetes
- **AI/ML:** Machine Learning, Deep Learning, LLMs, Transformers, LSTM, NLP, Computer Vision, GenAI, Pandas, NumPy, TensorFlow
- **Data Analytics/Tools & Platforms:** Power BI, Data Analysis, Data Extraction, Data Validation, Statistical Analysis, ETL, Git, Microsoft Office (Excel, Word, PowerPoint), ServiceNow
- **Certifications:** IBM Data Science Professional Certificate, AWS Cloud Essentials, Microsoft Azure AI Fundamentals, Microsoft Azure Data Fundamentals, Codecademy Python 3 Course, HackerRank JavaScript Intermediate, SQLAdvanced, Java, CSS, Python Basic Certificates

EMPLOYMENT HISTORY

California State University, ECS Dean's Office

Jan 2024 - Dec 2025

ECS IT CONSULTING STUDENT ASSISTANT

Sacramento, CA, USA

- Diagnosed and resolved 100+ weekly cross-platform technical issues (Windows, Linux, macOS) using ServiceNow, improving system stability and reducing downtime for 1,000+ users.
- Deployed and maintained 40+ lab systems using SCCM, improving software reliability and lab uptime.
- Optimized ServiceNow workflows and documentation, reducing repeat issue frequency and improving ticket resolution times.

California State University - Information Resources & Technology

Jan 2024 - Dec 2025

WEB DEVELOPER

Sacramento, CA, USA

- Supported Sacramento State's Information Resources & Technology team in improving campus web platforms, content quality, accessibility, and user experience for students, faculty, staff, and university departments.
- Developed Python-based automation workflows to analyze university web pages and digital documents, identifying outdated, duplicate, and non-compliant content for cleanup, remediation, and structured reporting.
- Applied machine learning classification, GA4 analytics, and benchmarking insights to organize university documents, identify underperforming web sections, and recommend data-driven content strategy improvements.

Trellix

Jan 2022 - Feb 2023

ASSOCIATE TECHNICAL SUPPORT ENGINEER

Bengaluru, India

- Provided technical support for FireEye/Trellix cybersecurity products (NX, EX, FX, AX, CM, PX-IA, Helix), troubleshooting and managing appliances, which reduced average resolution time and improved customer satisfaction
- Supported incident response, forensic analysis, remediation, and breach-prevention by handling customer calls, chats, and remote sessions, enabling timely containment of threats and preserving client data integrity
- Identified and reproduced customer issues in the lab, found root causes, and created Jira tickets to speed up engineering fixes.

Ramsai Food Products

Jan 2020 - Jan 2022

JUNIOR DATA SOFTWARE ENGINEER

Chittoor, India

- Cleaned and organized production, inventory, sales, and export datasets using SQL, Excel, and Power BI, improving reporting accuracy and supporting faster operational decision-making.
- Built Power BI dashboards, automated reports, data validation workflows, and reporting pipelines, improving data quality, real-time visibility, and reducing manual reporting time by 40%.
- Collaborated with operations and logistics teams to analyze sales and export trends, improving demand forecasting, inventory planning, and reporting turnaround time.

ACADEMIC PROJECTS

AI-POWERED PERSONALIZED NUTRITION PLANNING SYSTEM

Jan 2025 - Nov 2025

- Built a multi-branch fusion model integrating health metrics, mental-wellbeing scores, genomic SNP sequences, and protein-folding data using LSTM + Transformer architectures to predict personalized nutrient requirements.
- Merged and preprocessed 73,778 dietary records from NHANES and 4,983 genomic profiles from the 1000 Genomes Project, handling missing values, scaling, data alignment, and multi-format feature construction.
- Designed an optimized multi-output regression system predicting grams, energy, protein, carbs, sugars, fiber, fat, and cholesterol with strong model convergence, statistical validation, and deployment-ready architecture.

VIRTUAL TRY ON

Jan 2022 - Apr 2022

- Developed a virtual fitting tool using OpenCV and HaarCascade, enhancing the online shopping experience by enabling realistic previews of clothing items.
- Improved customer engagement by 30% through increased confidence in purchase decisions.
- Implemented a feedback mechanism that collected user preferences, leading to targeted marketing strategies and a 20% increase in conversion rates.
